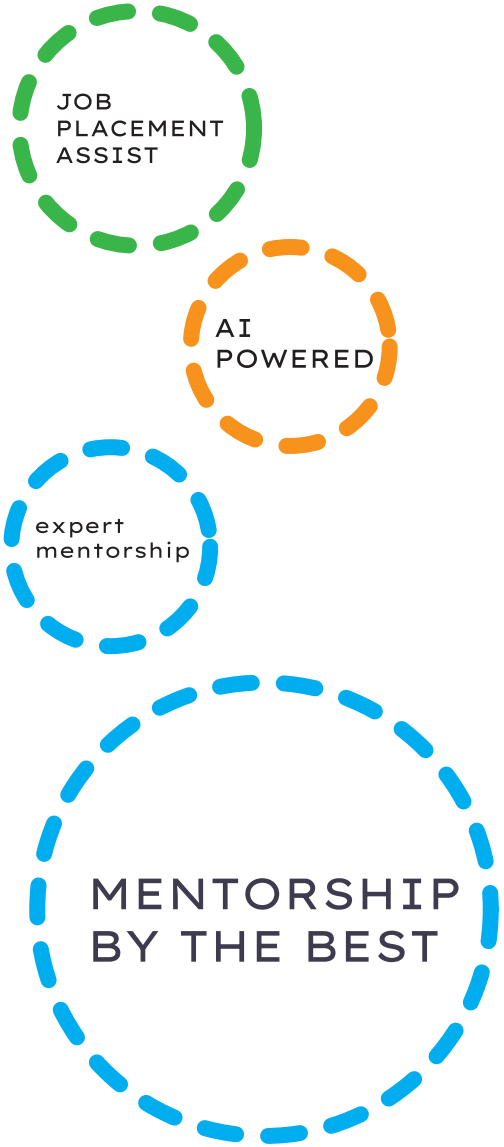
PROGRAMME COST

Duration: 6 Months Intensive Program``````
Investment: $50 USD per Month
Target: Students & Aspiring Developers
Format: Online Mentorship with Hands-on Projects

Total Programme Cost: USD150.00

DISCOUNT:USD150.00

magara AI



Programme Overview

Magara AI presents a comprehensive 6-month software development mentorship program designed to transform students into job-ready developers.

Our program combines cutting-edge curriculum, personalized mentorship, and real-world project experience at an affordable investment of just $50 per month.

Why Choose Magara AI?

🤖 AI-Powered Learning - Personalized learning paths adapted to your pace and style

👨‍💻 Expert Mentorship - Direct access to industry professionals with 10+ years experience

🛠️ Hands-On Projects - Build a professional portfolio with real-world applications

💼 Career Support - Job placement assistance and interview preparation

🌍 Global Recognition - Industry-recognized certification upon completion

magarq.AI

Curriculum - Month 1-2: Foundation Building

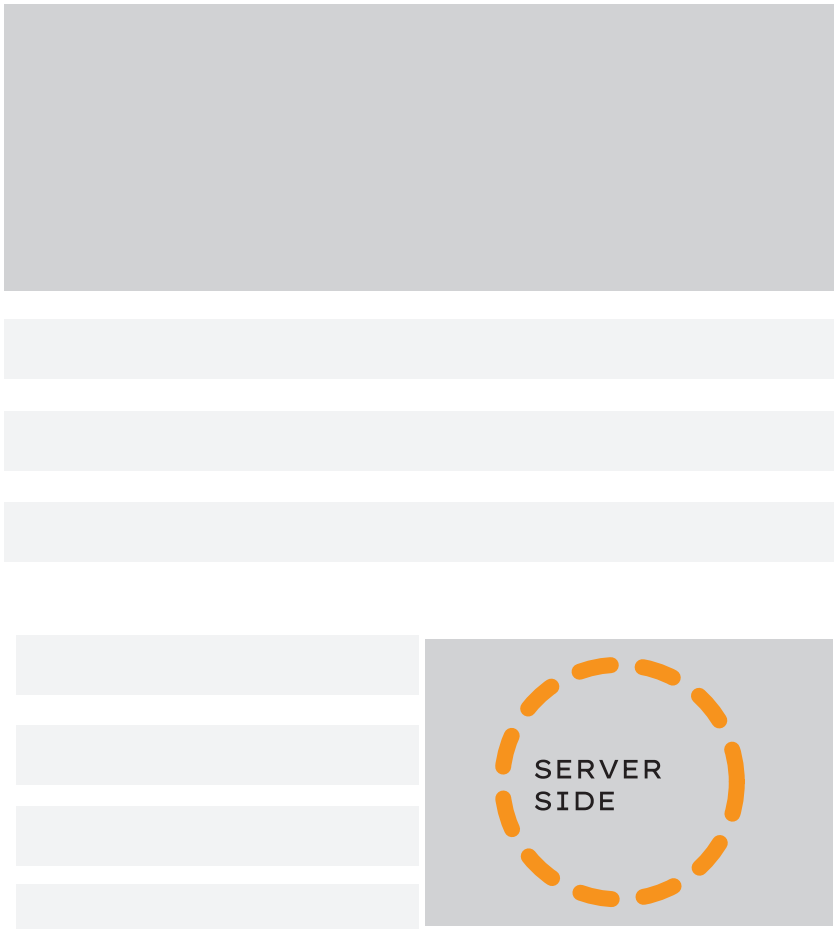
Month 1-2: Foundation Building
Web Development Fundamentals

HTML5 - Semantic markup, accessibility, modern HTML features
CSS3 - Responsive design, Flexbox, Grid, animations, preprocessing
JavaScript - ES6+, DOM manipulation, event handling, asynchronous programming
Version Control - Git, GitHub, collaborative development workflows

Design Principles

UI/UX Fundamentals - User research, wireframing, prototyping
Responsive Design - Mobile-first approach, breakpoints, fluid layouts
Design Tools - Figma, Adobe XD, design systems
Color Theory & Typography - Visual hierarchy, accessibility

Month 3-4: Backend & Database Development



Server-Side Programming

PHP - Modern PHP 8+, OOP, frameworks (Laravel basics)
Java - Object-oriented programming, Spring Boot introduction
Database Design - MySQL, PostgreSQL, database optimization
API Development - RESTful APIs, JSON handling, authentication

Development Environment

Local Development - XAMPP, WAMP, Docker basics
Package Management - Composer (PHP), Maven (Java)
Testing - Unit testing, integration testing, debugging techniques

Month 5-6: Mobile Development & Advanced Technologies

Mobile App Development

Android (Kotlin) - Native Android development, Material Design
Flutter - Cross-platform development, Dart programming language
Mobile UI/UX - Platform-specific design guidelines
App Store Deployment - Publishing to Google Play Store

Advanced Topics

Cloud Integration - Firebase, AWS basics, cloud databases
Progressive Web Apps (PWAs) - Service workers, offline functionality
DevOps Basics - CI/CD, deployment strategies, monitoring
Security - Web security, authentication, data protection

Learning Methodology

🎯 Personalized Learning Paths

Our AI-powered system creates customized learning experiences based on:

Individual learning pace and style
Previous programming experience
Career goals and interests
Real-time progress assessment

👨‍🏫 Mentorship Structure

1-on-1 Weekly Sessions - 60 minutes with dedicated mentor
Group Study Sessions - Collaborative learning with peers
Code Reviews - Professional feedback on your projects
Career Guidance - Industry insights and career planning

🛠️ Project-Based Learning

Each month includes practical projects:

Month 1: Personal portfolio website
Month 2: Interactive web application
Month 3: Database-driven web system
Month 4: RESTful API development
Month 5: Mobile app prototype
Month 6: Full-stack capstone project

🎓 Academic Excellence

Structured curriculum designed by industry experts
Regular assessments and progress tracking
Personalized feedback and improvement plans
Academic support and study resources

💼 Career Preparation

Portfolio Development - 6+ professional projects
Resume Building - Technical resume optimization
Interview Preparation - Mock interviews, technical challenges
Job Placement Support - Connect with hiring partners
LINKEDIN PROFILE ENHANCEMENT

🌐 Global Community

Peer Network - Connect with students worldwide
Industry Connections - Networking with professionals
